Useful energy control

Light control

Rotary and pushbutton dimmers for all kind of lamps. Light control to create the right atmosphere in all kind of rooms.

Energy cut-off

Control of room energy with key card switch for an easy and cost efficient solution.

Style

Effective style

Unmistakeable and elegant

The Style program is the modern archetype of the traditional series, both in terms of aesthetics and functions, which go beyond fashion trends. Its big rocker give a distinguishable view, clean and elegant.

Large range of designs and finishes

Climate control

Temperature comfort with energy efficiency in mind.

IP44 solutions

Easy to install, with the same colors and design IP44 switches and sockets. Maintain the same design in the bathroom or room balcony.

Miro

A contemporary classic

Unique atmospheres

Miro series combines style and the influence of late Bauhaus. This top-quality program has the perfect finish in all details, with exclusive and modern textures.

Always connected guest

Charging solutions

Offer the guests easy and actual state of art solutions. No more need to bring the charger for your guests.

Data and multimedia connections

Easy and decorative connectors that support HDMI, VGA, RJ45 or sound solutions to distribute data, video or sound through the room. Allow your guests to connect their devices and enjoy their contents in the TV room.

Iris Plus

Harmony in equilibrium

The contrast and elegance of curve and square design

A design where two design worlds are joined with taste and elegance to create a distinctive design.

Iris Plus Aluminium

Energy efficient solutions

Automatic light control

Different movement detectors to control light on/off in common zones. Safe and energy saving solutions.

Low energy consumption light guidance and signalling

Create low light atmospheres and signalling with the LED beacons.

Iris

The perfection of the curve

Easy integration

Iris design makes easy the integration of the switches and sockets in any decoration and ambient. Low dimension of its profile and the integration of the curve with the wall makes it discreet and the star of the decoration if necessary.
